
A TRIBUTE TO JOURNAL CONTRIBUTORS

ON BEHALF OF OUR AUTHORS AND READERS: A TRIBUTE TO OUR REVIEWERS AND BOARD MEMBERS

The first year together as the Editorial Team for Acta Medica Saliniana (AMS) is almost over and we believe we have taken many steps that have strengthened and improved the Journal. However, we are aware that improvement is only possible with the help and support of many people.

For that reason, we would like to take this opportunity to thank all the individuals who have given their time and effort to help AMS grow and thrive. We thank the members of our Editorial Board, Associate Editors and Editorial Council as well as all the experts who have graciously written editorials and reviews for the Journal. Their work and commitment have been invaluable.

In addition, we acknowledge with gratitude the many people listed alphabetically below who had an important role as reviewers during the 2008 and 2009. It is because of their critical thinking, fairness, and timeliness that AMS has managed to offer the scientific content as it did during the past year. We are ready to welcome them again along with many more motivated members of our readership who may be willing to donate their time to the most important element of progress in clinical medicine: the peer-review process.

Acta Medica Saliniana Editorial Team

Neda Aberle, Croatia
